

Fibrefusion

Environmental/Sustainability Policy of Fibrefusion

Fibrefusion is committed to protecting the environment and promoting sustainability. We recognise that our business operations can have an impact on the environment and society, and we strive to minimize our negative impacts while maximizing our positive contributions. Our policy is to:

Comply with all relevant environmental laws and regulations and strive to exceed them wherever possible.

Continually improve our environmental and sustainability performance by setting and achieving measurable objectives and targets, such as reducing our energy consumption, greenhouse gas emissions, and waste generation.

Promote sustainable practices throughout our operations and supply chain, by using environmentally responsible products and services, reducing our carbon footprint, and supporting local communities.

Involve all employees and shareholders in our environmental and sustainability efforts by providing training and education on best practices, engaging with local communities, and soliciting feedback on our performance.

Use sustainable design principles in the development of our products and services, considering the entire lifecycle of our offerings and striving to minimize environmental impacts.

Regularly monitor and report our environmental and sustainability performance to shareholders and the public, providing transparent and accurate information on our progress.

Fibrefusion will continually review and improve our environmental and sustainability policy and objectives to ensure that we are doing our part to protect the environment and promote sustainability. This policy applies to all employees and shareholders of Fibrefusion.

Signed,

Paul Browning
Director - Fibrefusion
